

Legend Options from Eterna Lighting

**ISO 7010**  
 (MAN INSIDE THE DOOR)

OR

**SIGNS DIRECTIVE**  
 (MAN RUNNING TOWARDS THE DOOR)

## WHAT IS THE DIFFERENCE BETWEEN MAINTAINED & NON MAINTAINED?

### MAINTAINED

**REMAINS ILLUMINATED FOR GENERAL USE, AND AT A REDUCED OUTPUT IN EMERGENCY MODE (IN THE EVENT OF A MAINS POWER FAILURE)**

Luminaire is continuously illuminated and switches on to emergency battery operation in the event of a mains failure.

### NON-MAINTAINED

**NOT ILLUMINATED FOR GENERAL USE, BUT WILL ILLUMINATE IN EMERGENCY MODE (IN THE EVENT OF A MAINS POWER FAILURE)**

An illuminated green indicator LED will be visible in general use (i.e. when mains power is live) to show that there is a healthy charge to the battery.

(general use)

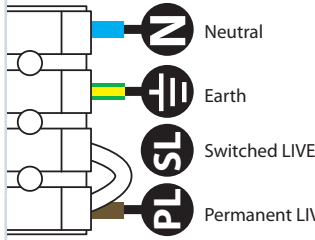

(emergency mode)

## THE COMPLETE EMERGENCY LIGHTING SERVICE

- ✓ Self-Test Range
- ✓ Battery Replacement Service
- ✓ Signs Directive + ISO 7010 range
- ✓ Lithium-ion battery options
- ✓ 5 Year Warranty on all LED Products  
(1 Year Warranty on batteries)
- ✓ Free Lighting Design service

**STAY SAFE  
 SAVE TIME  
 SPECIFY ETERNA**

## EMERGENCY VARIATIONS EXPLAINED

	Maintained / Unswitched (PL = Permanent Live)	The luminaire is continuously illuminated and will switch to "emergency" battery operation in the event of a mains power failure.
	Maintained / Switched (SL = Switched Live)	The luminaire can be switched on and off in normal operation, and it will switch to "emergency" battery operation in the event of a mains power failure.
	Non-maintained	The luminaire is usually switched off but will illuminate via "emergency" battery operation in the event of a mains power failure.
	Sustained	A sustained fitting has a dedicated separate lamp which will illuminate via "emergency" battery operation in the event of a mains power failure.
