Our economy 7 water heater controller just got better

E7+ The smart immersion heater controller

7
years
no quibble
warranty

E7+ The smarter immersion heater controller

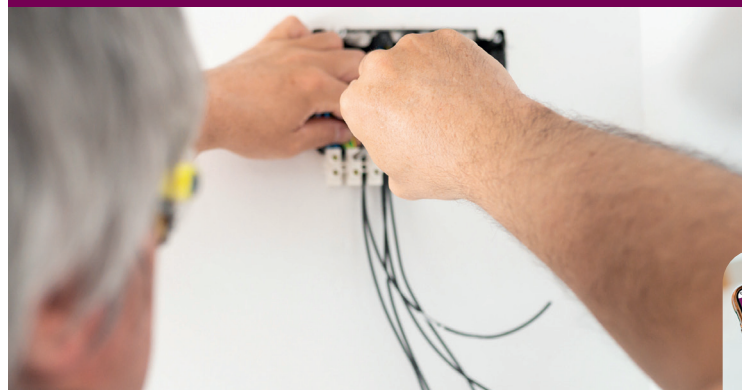

The new E7+ from Secure is the latest version of the Electronic 7 hot water programmer. E7+ is designed to control one or two 3kW immersion heaters, utilising off-peak electricity tariffs to provide a full tank of hot water whenever required. Each heater can be programmed separately for maximum energy saving and control.

Designed to be the successor to both the Electronic 7 and the Economy 7 Quartz, it is easy to install or retrofit. Now with a new compact interface that is perfect for newer installations, as well as an adaptor plate, which allows fresh installations to be more ergonomic and streamlined, whilst still making the E7+ a plug-in replacement for all the existing legacy water heaters from Horstman and other traditional immersion water heaters.

Easy to install and retrofit

Upgrade from our traditional immersion heater controls

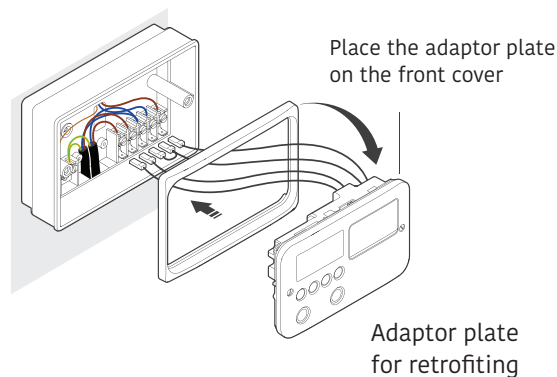

Electronic 7

Economy 7 Quartz

Economy 7 Quartz 2hr

The E7+ comes with an adaptor plate for retrofits. This allows fresh installations to be more ergonomic and streamlined, whilst still making the E7+ a plug in replacement for all the existing legacy water heaters from Horstman - Electronic 7 and Economy 7 Quartz.

Easy to use - with programmer or app

App features include:

- Energy Monitoring
- 7-day programming
- Boost function

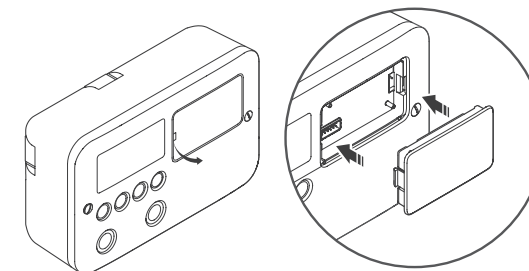

Secure heating control app

Control heating via Bluetooth or Wi-Fi

Out of the box the E7+ can also be controlled by the Secure Bluetooth-enabled app, within a property, and there is an optional plugin Wi-Fi adaptor that will turn the E7+ into a truly smart unit you can control from anywhere.

Easy to upgrade - to fully smart

Optional Wi-Fi adaptor to switch from Bluetooth to Wi-Fi if you need it
